anti
scratch

A type of finish similar to lacquer, Advance acrylic laminate is a non-toxic, anti scratch, reflective high gloss finish which give cabinets a smooth appearance. It is made of polymer fibre, available in a wide range of colours and will give a mirror-like look to your interior. It is a durable decorative option as it leaves a reflective and glossy sheen on the surface of shutters which lasts for years. It comes in a range of bright colours that uplift the aesthetics of your interiors.

ANTI SCRATCH

ACRYLIC LAMINATE

CLASSY & SUPER GLOSSY SURFACE
with Amazing features to stay longer in your interior

DURABILITY

Advance Acrylic laminate is highly durable & hard-wearing

RESISTANCE TO WATER & HEAT

Advance Acrylic laminate is water proof & resistance to heat & changing weather.

PREMIUM APPEARANCE

Gives the surfaces a super glossy, sophisticated appearance.

RESISTANCE TO SCRATCH

Advance Acrylic laminate is excellent scratch resistance properties.

LOW MAINTENANCE

Since Advance Acrylic laminate is anti scratch so it possesses very low maintenance. Just a normal wipe with clean cotton cloth is needed to clean it up.

PREMIUM FINISH

Highly reflective surface with a mirror-like sheen that retains its color & brightness over the years.

TIPS TO KEEP ACRYLIC GLOSSY LAMINATE NEW FOR YEARS

Thanks for selecting such a beautiful and long-lasting Advance acrylic laminate. It is very easy to maintain advance acrylic laminate. By following the some measures you can enhance the life of acrylic glossy laminate.

- To clean the surface of acrylic laminate do not use thinner.
- Wipe the surface gently with a non-abrasive cloth.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solution as these may damage the surface of the laminate.
- Use mild house hold glass cleaner like COLIN to remove more stubborn stains.
- Clearing should be done with water and a clean, non-abrasive cloth.
- Do not place hot cookware directly on the laminate.
- Acrylic Glossy surfaces looks more beautiful when used for A vertical applications.
- Always store acrylic laminates at temperature below 300 Celsius.
- Avoid the prolonged exposure to temperatures above 300 Celsius, that may cause damage to the laminate surface.

BEST WAYS TO USE ADVANCE ACRYLIC LAMINATES ON INTERIOR FURNITURE

- Always clean the dust particles properly from the substrate (plywood MDF, Particle Board) surface by cloth or soft brush.
- Always use good quality branded PVC adhesive to stick acrylic laminate on substrate. Please don't add water in adhesive before using it.
- Spread the adhesive uniformly by brush, roller or adhesive spreader on acrylic laminate and base substrate (Plywood, MDF, Particle Board).
- It is very necessary to remove the air between acrylic laminate and substrate. Please leave minimum 2mm of groove between two pieces of acrylic laminate.
- At the time of pressing acrylic laminate on base substrate (Plywood, MDF, Particle Board) always use soft pinch roller or normal pressing technique to protect surface from any damage.
- The pressing should be done from the middle of the panel and move towards to the sideline and corners of the panel.
- For better bonding of acrylic laminate on substrate, press it for minimum 12 to 15 hours

HOW TO GET RID OF GENERAL PROBLEMS LIKE BUBBLE & CRACK IN ACRYLIC LAMINATE.

- Avoid the lamination process of acrylic laminate under high humidity environment.
- Use the good quality branded adhesive during installation to avoid air bubble after installation.
- Prevent the base substrate (Plywood, MDF, Particle Board) to absorb moisture. Because after few days of installation, base substrate gradually loses moisture and this resulting in air bubble formation between acrylic laminate and substrate.
- Always use calibrated substrate for furniture. Don't use uneven surface substrate (Plywood, MDF, Particle Board) that may lead to air vacuum and air bubble which may appear after the installation.
- Take extra care during use of big size acrylic laminate for paneling because due to the bigger surface area, improper lamination may lead to air bubble formation after installation.
- Provide the proper recommended time because short bonding/pressing time during the installation of acrylic laminate may lead to air bubbles.
- Keep the acrylic laminate sheet evenly straight. Leave the roll acrylic sheet straight for minimum 48 hours before using it.

DO YOU KNOW HOW TO PREVENT THE COLOR FADE OR YELLOWING OF ACRYLIC LAMINATE?

- Do not expose your acrylic laminate furniture to direct sunlight, it may cause discoloring, fading and yellowing of the laminate.
- Don't use inferior quality over chemical dipped plywood as it can react with adhesive which may cause yellow patches after the installation.
- Don't use synthetic rubber adhesive for bonding as it may lead to brown / colored patches on acrylic laminates.
- Prolong exposure of acrylic laminate above 30-degree temperature should be avoided.

ACRYLIC

How Advance Acrylic laminate is BETTER than LACQUERED GLOSS

▶ Aesthetics

ACRYLIC LAMINATES are preferred decorative surface material for gloss finish. And, they add a visual appeal to your interior.

LACQUERED GLOSS are comparatively less striking in compared to **ACRYLIC** laminate & needs utmost care after & during application.

▶ Colors & Varieties

ACRYLIC FINISHES retain their color and brightness for ages and are available in plenty of vibrant colors.

While, **LACQUERED GLOSS** has limited variety of color & pattern.

▶ Maintenance & Durability

While **ACRYLIC FINISHES** are scratch resistant. They do tend to get scratched over the years, but always appear ultra-glossy and relatively smooth.

While **LACQUERED GLOSS** are tend to have scratches on its surface very easily.

▶ Cost

As **ACRYLIC FINISHES** are aesthetically more appealing and are easy to clean, they come with lower price than Lacquered Gloss.

While **LACQUERED GLOSS** comes with very high price tag in comparison to **ACRYLIC LAMINATE**.

▶ User Friendly and safety:

ACRYLIC LAMINATES are available in **1.50** and **1.25mm** thickness & they are lighter in weight. So it is safe to use **ACRYLIC LAMINATE** in interior.

LACQUERED GLOSS are available in **6mm** thickness and they are heavy in weight so it is very much risky to use it in interior. There is always a chance of accident during and after the use of Lacquered Gloss.

Do you KNOW?

The Difference Between 1.25 & 1.5mm Acrylic laminate

The thickness plays an important role in look and feel of **ACRYLIC LAMINATE**.

Just have a look:

1.25 MM Acrylic Laminate

1. Less scratch resistance, more prone to scratched & stains.
2. Less reflective surface, having low gloss effect
3. Comparatively less life

1.50 MM Acrylic Laminate

1. High reflective surface, having high gloss effect than 1.25mm thickness.
2. 100% Scratch resistance surface
3. Long life in comparison to 1.25mm

BEST WAY TO USE ACRYLIC LAMINATE:

To avoid the colour variation in **ACRYLIC** laminate during application in interior, please use the similar batch number acrylic sheets. There may be slight variation of colour in different batch number.
